

## **Kettering vaccinations script**

Hello, this is a message from the school nurses at Van Buren and Kettering Middle Schools. The state of Ohio requires all 7th graders to have the Tdap or Meningococcal vaccine or both on file by the first day of school, which is August 16. Students without required immunizations on file may be excluded from school, sports, and extracurricular activities. If your child has not received these important vaccines, have him or her immunized now and forward the shot record to your student's middle school. If you have any questions regarding the information in this message, please email or call your school nurse at Van Buren 499-1800 or KMS 499-1566. Thank you
